Clean air

Plants actively degrade VOCs and produce our oxygen from CO₂

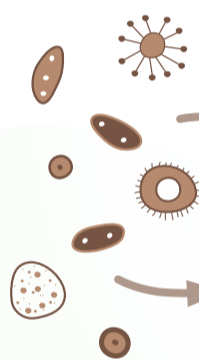

> Read more

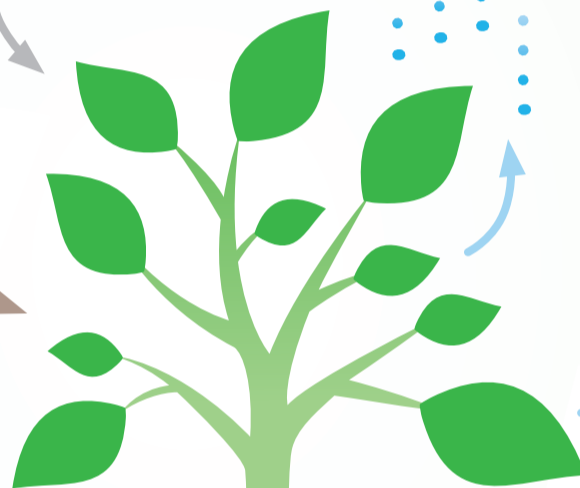

What do plants do for us?

Volatile organic compound (VOC):

- Formaldehyde
- Xylene Toluene
- Benzene
- TCE
- Chloroform
- Ammonia
- Alcohol
- Acetone

Vapour

Oxygen

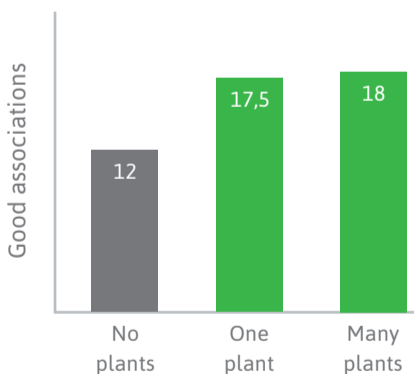

Water

Degraded VOC

It is important to have more green in homes, schools, in health care and workplaces

Performance

Improve performance by 20 to 40%

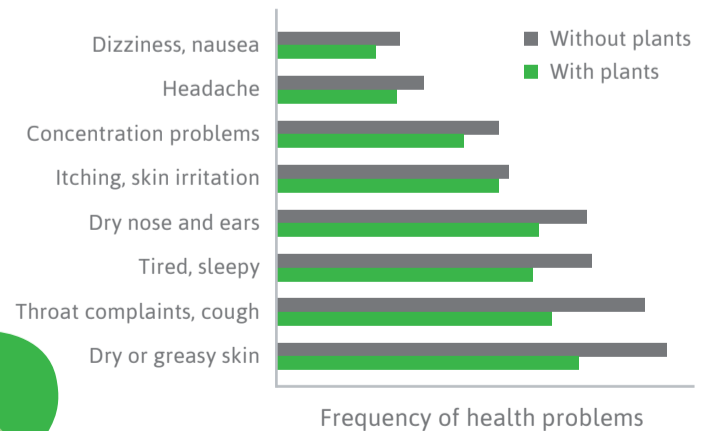

One plant per person is enough
